

Portable Solar Battery Chargers

BC-LI1 - Charges BB2590/U Li-Ion batteries

BCNI1 - Charges BB590/U, BB390/U or ALI116 batteries

Both solar chargers look physically similar and uses the same flexible solar panels. However, the models have different controllers to charge different chemistries optimally. The charger can also be fitted with both controllers to charge all chemistries.

Features:

- Reliable, manufactured for field usage
- Works with minimal sunlight
- Flexible, portable and lightweight
- Maintenance free
- LED charging status indicator

Specifications	
Max solar output	30W or 62W
Nominal solar voltage	12V 24V
Open circuit voltage	28V 56V
Weight	1.9kg for 30W
Colour	Camouflage
Mil-Standard applicable	STD-810C
