

M+R R Range - Oil Water Separators

Applications

Traffic Rated Applications:

- Vehicle washes of all types covering cars, trucks and buses
- Washes covering self serve, automatic roll-overs, tunnel, and multi bay washes
- Vehicle service stations including garages
- Dedicated bus and truck washes
- Work shops
- Car park

Features

- Capacities: 5 gpm – approx. 500 gpm
- Warranty : 15 years on OWS plates
- The M+R R Range are “installation kits” that are pre-built oil separators for insertion into underground square, round, oval, or rectangular vaults/sewer pre-cast concrete tanks.
- Typically installed with a silt tank before the Oil Water Separator tank, to drastically reduce the build up of fine debris which can greatly reducing the efficiency of the Separator.
