

## Flexible Splint

The flexible splint is moldable and allows for shaping into a strong support for any fractured or injured limb, as well as neck injuries.

### Compact

The Flexible splint rolls up into a compact bundle for easy storage and transportation.

### X-ray Translucent

Manufactured from food grade alloy, the flexible splint allows for X-Ray without removal.

### Easily shaped and cut to size

Golden Season's Flexible Splint can be cut and shaped to any form to fit the different fracture locations.
