

Mark IV Field Hospital Bed

Designed for Rapid Deployment by a Single Person...

With minimal training the Mark IV Field Hospital Bed can be set up into the operational configuration in less than 60 seconds.

Constructed of a bi-fold 6061 aluminum frame (OD Green), the bed includes a polyurethane foam pad with a water resistant, decontaminable cover.

The bed is manufactured to support a resting force of 850 lb without material fatigue, and is extremely compact for easy transportation and storage.

Unique Presence Sdn Bhd

Cleaning of the Field Hospital Bed is easily done with either a 10% bleach solution or other standard hospital cleaning products. The bed frame and mattress were designed to be extremely functional while taking patient comfort into consideration. The bed frame was designed to evenly distribute the patient's weight across the entire surface area and reduce pressure points.

The 3 in. thick polyurethane mattress provides patient comfort and prevents patient contact with the bed frame to further reduce the possibility of pressure sores over the use of the bed. Both the head and the foot of the bed frame are adjustable to 6 positions.

*Both the head and the foot of the bed frame are adjustable to 6 positions.
Extremely compact for easy transport and storage...*
